Casseforme L

MADE IN

Zero Sprechi e Riciclo

Grazie alle cassaforme Serie L puoi realizzare facilmente cubi in calcestruzzo, anche da materiale riciclato.

Pensa anche al calcestruzzo in eccesso che ti rimane in botte, perchè sprecarlo?

I cubi in calcestruzzo sono facilmente sovrapponibili grazie al sistema di bloccaggio rapido tra piramidi e permettono infinite applicazioni e la possibilità di espandere o modificare le costruzioni anche successivamente.

I cubi in calcestruzzo permettono la realizzazione di diverse strutture tra cui ad esempio:

Baie per immagazzinaggio materiali (inerti, rifiuti, mangimi...)

Muri perimetrali

Costruzioni temporanee

Arredo urbano e sicurezza stradale

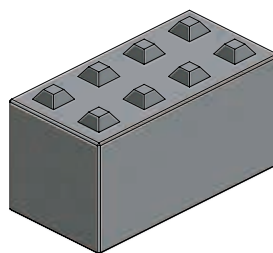

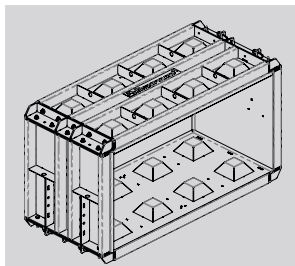

Noleggio per manifestazioni
